

NORTH FLORIDA

We look forward to seeing you at this month's Technical Program.

Going Green Through Electronics

Presented by:
Dan Fulmer with FulTech Solutions, Inc.

SPONSORSHIP OPPORTUNITIES AVAILABLE!

New to this chapter, we are now offering sponsorship opportunities. This is a great opportunity for you to highlight your company at our programs.

Dan Fulmer is the President and founder of FulTech Solutions, Inc. (est. 1995) a residential and commercial systems integration firm headquartered in Jacksonville, FL. Dan has more than 15 years of computer control experience, and more than 10 years in the home automation industry. He holds a BS from the University of Central Florida, where he studied computer science and environmental engineering. In 2002, Fulmer joined the CEA's TechHome Education and Training Committee and in 2003, he was elected to the CEA's TechHome Division Board, where he still serves. He has certifications in various areas including CTS, Extron AVA, Crestron Certified Programmer, and more. He has been a speaker at the past five Electronic House Expos and a guest speaker for many local events relating to building automation. More recently, Dan represented the United States and CEA at the Home Networking Global Summit in Seoul, Korea.

Today's technologies offer a variety of ways to make a building more energy efficient and save money, while also adding conveniences and true functionality. You can create and improve efficiencies while also adding value and conveniences that set you apart as a builder. Adding a PV system and a control system can allow control of energy needs and usage. You can set an energy threshold, measure the amount of electricity your Photovoltaic system produces and measure the amount you are using. The system can automatically adjust lights, HVAC and other systems to tune them to remain within the threshold.

WHEN:
TUESDAY
February 9, 2010
7:30 AM Breakfast
8:00 – 9:00 AM Lecture

WHERE:
Stellar (Commercial Building)
2900 Hartley Road
Jacksonville, FL 32257
